

INSTRUCTIONS FOR ALLERGY TEST

1. In order to evaluate the allergy test accurately, certain medications should not be taken before the test is performed. The medications include antihistamines and some tranquilizers. Please see the attached list.
2. If you are running a fever or have an attack of asthma or hay fever, testing should be delayed.
3. If you, for the above or some other reason cannot keep the appointment, please notify our office at least 2 days in advance. If this date conflicts with previous plans notify us immediately.
4. Do not change your diet before your test.
5. Please wear short-sleeved or sleeveless apparel.
6. Check with your insurance carrier to make sure allergy testing and injections are a covered service.
